2024年，宋梦岚同志坚决贯彻集团及学校制定的战略目标，以系统性思维推动产教融合纵深发展，在人才培养、平台建设与校企协同领域取得突破性进展，为三联康养产业高质量发展提供坚实有力支撑。

## 创新融合 务实笃行

——记安徽三联集团2024年度先进个人、  
安徽三联学院现代康养产业学院院长  
宋梦岚

构建协同机制，夯实融合根基。宋梦岚同志牵头构建“政—产—学”三螺旋架构，这一架构犹如坚固的基石，为产教融合提供了坚实保障。其中，科技成果转化平台的建设是关键环节。通过这一平台，实现了“产学研转创用”一体化发展，使科研成果不再局限于实验室，而是切实走向市场，转化为实际生产力。在此过程中，创新链、产业链、资金链与人才链得以深度融合，各方相互促进、协同发展，形成了强大的合力，为现代康养产业学院的发展注入了源源不断的动力。

推进平台赋能，深化教育实践。在推动产教融合的创新工作中，宋梦岚同志取得了丰硕成果。她主持申报的省级产业学院成功获批，这不仅是对学院综合实力的高度认可，也为学院带来了更多的发展机遇和资源。此外，在她的带领下，现代康养产业学院获批“一试三证”试点及“智能技术适老化应用”省级微专业。这些试点和专业紧密对接市场需求，为学生提供了更具针对性和实用性的教育，使他们在毕业后能够迅速适应工作岗位，成为行业亟需的专业人才。

落地标杆项目，贯通校企路径。安徽省首个智慧型养老驿站——“三联智慧康养服务驿站”在宣城市宣州区落成并投入运营，这是宋梦岚同志在推动产教融合方面取得的又一重要成果。这一校企合作项目实现了“自我造血”功能，标志着产教融合成功跨越了“最后一公里”，为产业学院的可持续发展奠定了坚实基础。该驿站不仅为学生搭建了实习与就业的平台，也为推动当地养老服务事业做出积极贡献，成为产教融合的成功典范。

重构培养体系，强化教学改革。在人才培养模式改革方面，宋梦岚同志深刻认识到，传统的培养模式已无法适应现代产业发展的需求。为此，她积极推动改革，着重培养学生的实践能力和创新精神。通过与企业深度合作，将真实的企业项目和案例引入教学过程，使学生能够深入了解企业的实际需求，从而提升解决实际问题的能力。与此同时，她还注重加强师资队伍建设，引入具有丰富实践经验的企业专家担任兼职教师，为学生传授最新的行业知识和技能。此外，她根据产业发展趋势和岗位技能要求，对课程进行优化整合，增加实践教学比重，使

课程内容更加贴近实际应用场景。

2024年，宋梦岚同志以坚定的信念、创新的精神和务实的作风，在产教融合的道路上取得了显著成绩。她的一系列探索与实践，不仅为现代康养产业学院培育了大批优秀人才，也为其他院校提供了宝贵的实践范本。展望未来，在她的带领下，安徽三联学院现代康养产业学院定将在产教融合的道路上持续奋进，为康养产业发展和社会进步作出更大贡献。

## 春风十里 如约遇景

春和景明，揽一缕清风入怀，留一抹新绿入梦。路旁点点寂静，杏花开满巷口。风声瑟瑟，穿过院子与花香撞个满怀。流连处，枝头山茶暗吐芬芳，桃花梨花盈盈流动，白玉兰初上枝头，郁金香争相竞艳，恰似“乱花渐欲迷人眼”。明知“最是人间留不住，朱颜辞镜花辞树”，却仍愿“松花酿酒，春水煎茶”，醉心于这春日花香。

河岸边，山青草漫漫，杨柳醉春烟。树上丝丝新芽，泥土点点新绿，处处迸发着生机与活力。“草长莺飞二月天，拂堤杨柳醉春烟。”风带来了故事的种子，播种在泥土里，待到秋来九月八，再与君细数冷暖情长。

“春日游，杏花吹满头。”春日出游，循风而行，与溪山为伴，与云月作友，在阳光下流连忘返，邂逅独属于春天的温柔。浴风者，当享受春日，留恋春日，与十里春风同行，共赴一场盛大的春日邀约。

“春风尔来为阿谁，蝴蝶忽然满芳草。”春天之所以明媚，是因为历经冬天的严寒。待凛冬散尽，

阳光便落下，在万家灯火前，轻吻人间。春天谱写了一部最伟大的作品供世人欣赏，“暖雨晴风初破冻，柳眼梅腮，已觉春心动。”它将温柔藏入巷陌，拂过柳眼梅腮，漫过海晏河清。文人墨客续写春光好景，一写便是千年流光，罢笔之时，欲晚天光，这才惊觉漫漫春烟已流过人间百川千万里。

你若是续写春天，就要写那春风带来的喜悦，写那“几处早莺争暖树，谁家新燕啄春泥”的柳陌二月；写那“沾衣欲湿杏花雨，吹面不寒杨柳风”的阳春三月；写那“人间四月芳菲尽，山寺桃花始盛开”的暮春四月。最美人间春日景，最暖不过春日风。放眼望去，整个春日，都是生命力独享风流的时节。

到底要如何感谢春天？感谢于仅仅想拥有一缕清风，它却能用春风带来整片柳暗花明。你看，山间重染青绿，人间重返生机，此刻又是一年中最美好的光景。

# Technology Leads Industry–Education Integration

## — Anhui Sanlian Group Holds the 2025 Science and Technology Innovation Conference

On March 8, the 2025 Science and Technology Innovation Conference of Anhui Sanlian Group was grandly held in Hefei. The meeting focused on the themes of "formulating technological planning, restructuring management systems, strengthening team building, and promoting applied research," discussing the blueprint for technological innovation from 2025 to 2029. Leaders, including Professor Jin Huqing, the founder of Sanlian, Wang Guanghu, the provincial education supervisor and secretary of the Anhui Sanlian University Party Committee, Yuwansheng, the chairman of Anhui Sanlian Group, and Jin Qing, the executive president of Anhui Sanlian Group, attended the meeting.

The opening ceremony commenced with the solemn singing of the Sanlian anthem, followed by an opening speech delivered by Executive President Jin Qing. He emphasized that in the face of changing circumstances, we must "regard technology as our engine and innovation as our driving force" to seize the initiative and secure our future in this new wave of competition. Subsequently, the nine affiliated units of the group reported their 2025–2029 technological development plans, discussing existing issues, planning highlights, and innovative measures.

Professor Jin Huqing, the founder of Sanlian, delivered a keynote report titled "The Path of Scientific Research." He first reflected on the highlights of

the developmental journey of Sanlian's scientific research, noting that Sanlian had developed the first set of driving simulation, driving testing, and driving examination systems, undertaken a series of national and provincial major scientific research projects such as the National Science and Technology Support Program and the National "863" Program, and established multiple provincial and national-level innovative research platforms, including the National Engineering Research Center for Vehicle Driving Safety and provincial engineering research centers. The group has also received numerous national and provincial scientific and technological awards, including first and second prizes for technological advancement. He then analyzed the current state of Sanlian's research and reflected on various issues, proposing solutions from the perspectives of top-level design, strategic layout, system reconstruction, and management reform.

Secretary Wang Guanghu delivered a special report on "Unity and Cooperation in Scientific Research." He stated that we should achieve unity and collaboration among research personnel through organized scientific research, integrate strengths, offset shortcomings, and fully unleash the "1+1+1>3" effect. It is essential to accurately grasp the basic requirements of unity and collaboration, actively explore effective models, and strengthen collaboration among team members, departments, and units, while closely leveraging the two major platforms in the north and south for cooperation. High-quality development has no room for bystanders, and technological innovation has no outsiders; only through collaboration can we produce outstanding works.

The conference invited experts from the Hefei Science and Technology Bureau to give a lecture

on "Policies and Practices for the Transformation of Scientific and Technological Achievements." Professor Feng Zhongxiang, the director of the Transportation and Safety Research Institute at Hefei University of Technology and a recipient of the Anhui Provincial Talent Award, presented a lecture titled "Organizing Planning for Scientific Research Through Point-to-Surface Approach—A Case Study of Traffic Personnel."

During the conference, three group discussions were held surrounding the keynote speech, the technological development plans of various units, and expert lectures. After in-depth discussions, representatives from the attending parties summarized the results of the group discussions and reported back.

At the closing ceremony, Chairman Yuwansheng of Anhui Sanlian Group summarized the achievements of the conference. The conference formed consensus, boosted confidence, clarified direction, outlined blueprints, broadened perspectives, and planned layouts. It explored systems, innovated mechanisms, focused on team building, and created synergy, while learning policies and drawing strength. It culminated in the Sanlian consensus that "the development of Sanlian must take the route of technological innovation and industrial innovation, and Sanlian people must seize the opportunity to fully integrate into the new wave of technological revolution and transformation."

At the end of the conference, Professor Jin Huqing, the founder of Sanlian, delivered a concluding speech, stating that this was the first strategic meeting convened to collectively discuss innovation and development plans among senior officials, research managers, and key representatives from various units. Despite it being a

weekend, attendees participated with great enthusiasm, reflecting that the timing of the innovation conference was indeed relevant. During the meeting, various units identified problems, analyzed root causes, and subsequently organized multiple rounds of specialized discussions, proposing refined solutions to the issues at hand. He emphasized that all units should take this conference as a starting point, earnestly develop their technological development plans, establish a long-term promotion mechanism, and solidify the foundation of innovation with a pragmatic approach, ensuring that Sanlian Technology will usher in a new era of brilliance.

The conference called for all units to promptly convey the spirit of this meeting and diligently formulate their "2025–2029 Technological Development Plans," further improve the system for technological innovation, enhance the introduction of core talent, accelerate existing platform construction, strengthen applied technology research, promote the transformation of scientific and technological achievements, and strive to build a new development pattern of "technology leading, industry–education integration, and interdisciplinary connectivity."

The conference lasted for two days, with a total of 91 participants, including major leaders, departmental heads, and key research representatives from various units of Anhui Sanlian Group, as well as heads of various faculties, student career entrepreneurship center representatives, and key research personnel from Anhui Sanlian University.
